

ADDRESSED TO
BENEDICT GREY
GOVERNOR OF THE MOON SETTLEMENT

Dear Governor, friends,

My name is Mary Troy, and I personally know many of you. I come to you with an urgent mission. As you know, the situation in this region is very unstable and recently ten or more settlements and moons have been attacked by the so-called *Browncoats*. Some of the settlements were burned to the ground. This act of aggression, particularly against civilian targets, is unconscionable.

Luckily, we managed to evacuate most of the residents. At this moment they have no place to live, having lost their homes and possessions. The Alliance will, of course, take full responsibility for them as citizens in distress. What I ask of you is that you accept them as residents of the Moon. Of course, all of your rights and privileges will be respected; the Alliance is committed to deliver the essential supplies and technology to the Moon settlement.

The ships will arrive in your orbit within one hour. Please anticipate the arrival of 20,000 settlers.

Thank you.
Mary Troy
